

Cisco

- [CLI - show running-config](#)
- [CLI - Start](#)

CLI - show running-config

Ein Beispiel von einem Cisco Switch:

```
switchdraf8a4#show running-config
config-file-header
switchdraf8a4
v3.2.1.1 / RCBS3.2hotfix_950_377_136
CLI v1.0
file SSD indicator encrypted
@
ssd-control-start
ssd config
ssd file passphrase control unrestricted
no ssd file integrity control
ssd-control-end cb0a3fdb1f3a1af4e4430033719968c0
!
!
unit-type-control-start

```

1. Config-File-Header

- Gerätenamen und Firmware-Version:

```
switchdaf8a4#show running-config
config-file-header
switchdaf8a4 # Gerätename des Switches
v3.2.1.1 / RCBS3.2hotfix_950_377_136 # Die Firmware- bzw. Softwareversion inklusive eines
Hotfixes
CLI v1.0 # Die Version der Kommandozeilenschnittstelle
```

Diese Zeilen geben den Namen des Switches, die installierte Firmware/Softwareversion (inklusive eines Hotfixes) und die Version der Kommandozeilenschnittstelle an.

- Verschlüsselte Konfigurationselemente:

```
file SSD indicator encrypted # Weist darauf hin, dass bestimmte Konfigurationsbestandteile  
verschlüsselt gespeichert sein können
```

Hier wird signalisiert, dass bestimmte Konfigurationsbestandteile verschlüsselt gespeichert sein können.

- Header-Abschluss:

```
@ # Das „@“ markiert hier das Ende des Headers.
```

Das „@“ markiert das Ende des Headers.

2. SSD-Control Block

3. Unit-Type-Control Block

4. Voice VLAN OUI Table

5. Fehlerbehandlung (Errdisable Recovery)

6. Energiemanagement und Bonjour

7. Hostname und Zugangskonfiguration

8. Logging

9. Benutzer und Authentifizierung

10. Netzwerkdienste

CLI - Start

Frischen Cisco Switch über CLI Configurieren

1. Anmelden

Default Login:

User: cisco

Passwd: cisco

Danach will er direkt, das du dem Switch einen neuen User und ein neues Passwort gibst.

```
Detected speed: 9600
```

```
User Name:cisco
```

```
Password:*****
```

Please change device default username AND password.

Change of credentials is required for better protection of your network.

Please note that the new password must comply to the following password complexity rules:

1. The password must be at least 8 characters long.
2. Password must contain at least 3 of the following types: lowercase letters, uppercase letters, numeric digits or special characters.
3. A character can not be repeated consecutively more than 3 times.
4. The password cannot contain more than 2 sequential characters or numbers, or the reverse value of these sequences.
5. The password cannot contain the username or a reversed form of username.
6. The password cannot contain the manufacturer or product name or a reversed form of such.
7. The password cannot contain a password that is part of a predefined list of breached or dictionary based passwords.

```
Enter new username: Pluto10982
```

```
Enter new password: *****
```

Confirm new password: ****

Username and password were successfully updated.

switchdaf8a4#

2. Config anzeigen lassen

Mit `show running-config` kannst du dir die laufende Konfig anzeigen lassen

```
switchdaf8a4#show running-config
config-file-header
switchdaf8a4
